GH

1. Background

Trinity Metals Website Modernization.

Trinity Metals is a Mining Company that operates in Rwanda, with three independent subsidiary companies namely, Rutongo Mines Ltd, Trinity Nyakabingo Mine Ltd, and Trinity Musha Mines Ltd. Trinity was launched in 2022 and that's when our website was developed (<https://trinity-metals.com/>). As the company grows a lot has changed Trinity Metals Limited is seeking to modernize its existing website to improve user experience, enhance functionality, and align with current web technologies and design trends. The current website is outdated in terms of design and technology, lacks mobile responsiveness, and has limited functionality.

1. Formal Inquiry.

- 1.1 Due to the need to modernize Trinity Metals' website, we contacted different suppliers through a tender.
- 1.2 Five bidders responded to the Enquiry, ETITE Ltd, Eye of Citizen Technology Company Ltd, Ndiisi, Igihe Ltd and Strettech Ltd.
- 1.3 The bidder Strettech Ltd quoted very low price (outlier) compared to the rest, their presentation was not convincing and therefore not considered.

lm

4. Recommendation

We recommend IGIHE Ltd to be awarded the Tender. They offer the most commercially competitive price compared the rest, they also agreed to change Development Platform from WordPress to Next JS or React JS depending on our preference.
