Subject: RTK GNSS Rover G4 DGPS

Dear General Manager,

I am writing to request your approval to purchase a DGPS.

We have experienced significant delays in obtaining survey surface-based data due to lacking a DGPS on site. Although we have borrowed equipment from Rutongo and Nyakabingo, this has often resulted in extended waiting periods or the need to return the equipment before completing our tasks. Having a DGPS on site is important for our daily operations.

We also have pending projects requiring a DGPS, such as surveying Duha, Nyagakombe, Ntunga, and other sites including positioning MUNINI SHAFT which needs to be urgently positioned. Additionally, other departments may need to use this equipment.

I have included the budget for purchasing a DGPS in our 2024 plans, intending to acquire it in 2025. I have identified a nearby supplier in Kigali, eliminating the need to purchase the equipment abroad.

Please find the attached quotation for your review. I would appreciate your approval in advance.

Thank you

Gilbert Irandengeye
