Subject: Approval requests

Dear GM,

Given the need to calibrate the XRF and new EDXRF that we are currently having at Nyakabingo, as per our phone conversation, we are seeking your approval to analyze our samples (both low and high grades) through ASL. This will allow us to calibrate the machine and having them as our reference materials while awaiting our customized ones. A total of 7 samples will be sent per stream, with an estimated cost of 1,591,016 Rwf for geological grades and 2,333,485 Rwf for production samples, bringing the total to 3,924,501 Rwf.

Attached is the quotation for your considerations.

Regards,

Juliette Confiance Kabatesi
