Subject: 4X3 pump bearings and shaft repair

Dear GM,

After inspection done Sunday, 12 October 2025 on 4X3 Spiral pump, we found that two bearings and shaft were worn out and can not continue running in order to keep other parts safe. This shaft needs to be repaired and there is a need of 2 bearings so that we can assemble the pump and back it in operation.

Shaft repair is 137,000 Rwfs and 2 bearings are 506,000rws with the total sum of **643,000** Rwfs. Quotations are attached.

I'm looking for your approval to proceed with the repair and procurement procedures.

Regards.
