Exploration Drilling Services

Background information

Trinity Nyakabingo Mine Ltd intends to engage an experienced drilling company for diamond core drilling. The scope of this work includes the mobilization of the drill rig to Nyakabingo mine and drilling. The objective of this campaign is to test the depth extent of mineralized quartz veins and their host graphitic shale sequence beneath the currently developed underground workings. This will be used to validate geological continuity below existing mine levels and improve confidence in long-term mine planning.
